

Mega Power #11 Engine Stop Leak

Protects Seals and Prevents Engine Oil Leaks

Product Description: An advanced seal conditioning additive for engine oils.

Benefits:

- ~Designed specifically to benefit seal performance on modern gasoline and diesel engines.
- ~Keeps seals properly conditioned to effect maximum seal performance.
- ~Prevents oil leaks by keeping seals in top condition.

Mega Power #11 Engine Oil Stop Leak is advanced seal protection technology to prevent seal shrinkage and seal embitterment problems which can lead to oil leaks. It is best applied after engine seal replacement to help new seals condition properly for long service life. #11 will also help reduce leakage in old seals that are already beginning to leak, if the seals are still in workable condition. It is not intended to restore seals which are fully deteriorated.
